How to Build or Remodel "Green"!

Building "Green" saves the planet and cash...

Do you know what the hottest trend in homebuilding is right now?? That's right, it's building smaller homes that are energy efficient and "green". What is "green"? According to the National Association of Homebuilders, building green means lowering operating costs, increasing comfort, improving environmental quality, and enhancing durability and maintenance. Below are some tips from Armstrong to help you focus on being green on your new home or remodel project.

- Lower your energy costs with proper seals and insulation in addition to energy star rated windows and appliances.
- Use natural and sustainable green materials such as bamboo

flooring, which lasts long and is easy to maintain.

- Use siding made of recycled materials that offer 50 yr. war-

Armstrong will work with you to design an efficient and environmentally friendly home.

ranties and come primed to use less paint.

- Utilize Armstrong's panelized wall's, which are built in a con-

trolled environment. That means less waste and controlled removal of waste material.

At Armstrong, we are committed to working with you to design a home that fits your needs and saves you cash in the future, Building and/or remodeling "green" is one of the best ways to increase your comfort, and reduce your home's operating costs.
