Panelization Facts

The Facts show why Panelization is the best way to build!

We believe our building system is the best way to build or remodel your home, and the facts back that up!

Total Building System — Armstrong's system is a total building system, utilizing high tech design and laser cut materials. To read all the benefits of our system, [click here](#).

Less Lumber, Less Waste— A BSC study, in conjunction with the Wood Truss Council of America found that construction of a 2,600 sq. ft. home with trusses and panels used 26% less lumber, generated 76% less waste, and was constructed in just 37% of the man hours of a similar, stick-built home.

Reduced Expenses & Construction Time— Our homes can be framed up in a day, with a third of a crew! Our unique system includes wall panels that have siding

Wall panels built with 26% less lumber in 37% of the man hours of a stick built home!!!!

and windows already installed greatly reduced time spent on the jobsite, saving you \$\$.

More Accurate—Panelized homes utilize laser pre-cut

materials making your home more accurate and weather-tight. More accuracy also provides you a more accurate budget. We do not have to include a bunch of extra lumber on our jobs to cover mistakes on the jobsite.

A majority of home built today utilize some or all panelized products. At Armstrong, we have been panelizing long before the completion. Our unique system goes a step beyond the average company to save you even more time and money!
