All About the Armstrong Framing Package

The benefits of being an owner-builder...

Being an Owner Builder may sound overwhelming to you, but it is your best chance in today's market to build instant equity on your home! With Armstrong's guidance, the process will go smoother than you ever imagined.

First off, lets talk about what being an owner builder entails. Basically, Armstrong will provide you with the framing package which includes wall panels, roof trusses, exterior doors, etc.to set on your foundation. If you are located in the state of WA, we'll provide a crane for the set and framers. Out of state, you would need to coordinate this yourself.

You manage your own project, manage the subcontractors, and, if you like, even do part of the

work yourself. This program is specifically designed to make your job much easier and to save you both time and money! But, you will not be doing this project

On-site while a framing package is being set by crane...

alone! With over 50 years in the home building business, Armstrong can assist you find lenders who work with owner builders, offer construction support and

building expertise. Also, in the state of WA, we will finish your home up to any level you wish. For example, if you just want to manage the inside projects, we can put up the outer shell, including roofing and you can manage the interior. Just remember, the more you do yourself, the more you save! Much more information can be found at our website, including video testimonials and descriptions of the Armstrong Owner Builder Program.
