## Current Trends in Home Renovation

### Let Armstrong work with you to give your home a fresh look.

New trends in [home renovation](#) are constantly changing due to the varied needs and tastes of homeowners. Here are some of the hot trends in home renovation for 2010.

- Increasing your space by utilizing **outdoor space**. This is a great way to increase your functional space without breaking the bank. It is easy to maintain and lets you use more of your property. Renovations include outdoor kitchens, patios for entertaining, fireplaces, etc.

- **Open floor plans** are still very much the trend in 2010. Renovating to include an open floor plan is a good investment and is great for entertaining. With the way people live today, the formal dining area is featured

less and less in [new floorplans](#).

- Renovating with **green products** is another huge trend in 2010. Popular items include tankless water heaters, sustain-

**An Attic Conversion is a great way to add extra living space if you do not have room to build out on your property.**

able floors, and increased insulation.

- **Attic conversions** are also a popular remodel this year. It is a

great way to add an extra bedroom or living space at a lower cost than adding on to your home and has a higher return on investment.

- Lastly, a new trend for 2010 is adding **dual home offices**. With most families have dual incomes, it makes sense for some homes to have 2 home offices, or a extra bedroom large enough to have 2 work stations.

[Armstrong Homes](#) is ready to work with you on any home renovation project. We will work within your budget and get your project done.
