It's a Great Time to Build With Armstrong

The Advantages of Building Now with the Armstrong System

Although you may hear otherwise, the timing is great to start building your new home for many reasons.

One great reason to start building is that we are still seeing historically low interest rates. They won't stay that way forever, so take advantage before they start to rise again.

Another great reason to build now is that there are many great contractor's available to assist you and many of the bad one's have been purged from the industry. This is a great advantage to the Armstrong Owner Builder client, who now has available subcontractor's to finish his/her home. In the past, it has always been a challenge to find the right people and schedule them to

ensure a smooth project timeline. Armstrong will sell you a framing package, up to any level and work with you to be successful as an owner builder,

The Armstrong System at a recent home set. Sided Wall panels are lifted by a crane truck and set in place.

helping you achieve instant equity!

Also, a big benefit to the potential Armstrong Homes client is

that the cost of land has decreased and may have bottomed out in your area. You may not find a better opportunity to pick up a parcel of land to build your dream home.

Overall, there are some great opportunities the Armstrong System provides and it has never been a better time to look at your options!

New Project of the Month

Click here to see our May project of the month. This month we are featuring a truly unique home built by Armstrong Construction. That's why our system is so great, we can help you build a simple starter home from a stock floorplan, or a one-of-a-kind custom dream home

New Updates on Facebook!

Come visit and become a fan of our Facebook Site. This month I added lots of pic's that show our process from start to finish! There are currently over 240+ pictures of our homes! Check back often for timely articles and current events. Thanks!

Engineered Trusses

Are you planning on a roofing project, or need engineered truss drawings to submit for permitting? Armstrong has it's own Truss Department that utilizes Mitek engineered trusses. We can design your trusses and supply you all the paperwork you will need to start your project.
