Cut Your Energy Bills With a New Home

Take advantage of energy efficient systems in your new home or remodel

If you are building new or remodeling, take advantage of new technology that will save you big \$ on your energy bills.

Sealed Envelope — Start w/ energy efficient insulation and then ensure the outer shell of your home has a sealed envelope w/ o leaks. [Energy Star](#) estimates you can save up to 20% on energy costs annually.

High Efficiency HVAC— Invest in the best HVAC system w/ high efficiency to save more \$ on your energy bills. Since this system is a long term investment, you can expect to recoup your up-front costs with many years left on a high efficiency HVAC system.

Low E Windows & Doors— This is especially true for remodels. Replace those old windows & doors to see large energy savings.

Hot Water Systems— Hot water accounts for about

The Energy Star website is a great resource for learning about new building products and techniques.

www.energystar.gov

15% of energy bills. Efficient systems include tankless, heat pump, and solar systems.

Energy Efficient Lighting—

Don't forget to use energy star rating lighting on your new home or remodel. They help you save \$ on your utility bill and protect the environment with less greenhouse gas emissions. To read more, [click here](#).

Energy Efficiencies are a great way to save \$ over the long term w/ your new home or remodel. Armstrong will always work with you to ensure your home has the best products & systems that fit your needs.
