The Benefits of Panelization

Armstrong's off-site wall panels are better than on-site construction

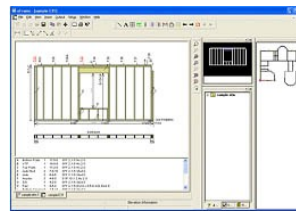

Do you know the difference between a panelized home, stick built home, and a manufactured home? If not, you are like many people who are confused by a lot of misinformation.

Armstrong Homes utilizes the off-site panelization method which means that wall panels are constructed stick by stick in a controlled factory plant. These panels are laser cut for precision and assembled on a square table ensuring accuracy. They are then shipped to the jobsite and lifted into place on a foundation by a crane truck.

An on-site stick built home is assembled at the job site and walls are tilted into place, where a manufactured home is built entirely in a factory and then

shipped to a jobsite.

We believe the Armstrong method is the best because it is the most accurate, allows for

All Armstrong wall panels are designed with the latest software and are laser cut for precision

customization, and **saves you time & money!**

Our wall panels can be built fully complete with windows and

siding installed, or up to any level you wish. We can work with almost any home plan or idea you may have in addition to our stock [floorplans](#).

Armstrong Homes is committed to helping individual home builders and contractors complete their projects on-time and within budget.

We would be happy to discuss your project and assist you in any way. Please visit our website at www.armstrong-homes.com or feel free to email me with any questions at:
