

ARMSTRONG PRECISION-MANUFACTURED BUILDING COMPONENTS

Advantages to professional builders of single, multi-unit and commercial construction.

In a competitive world where profit margins are always under pressure, pre-manufactured components are rapidly gaining favor among well-informed builders and developers.

Watch a project under construction with Armstrong components and you're immediately struck by the pace of construction. Houses and commercial structures can be erected and roofed in a fraction of the time—in just a day for

many homes. Armstrong wall panels and roof trusses are built under exacting factory conditions, ensuring quality and full optimization of materials.

Going from a foundation to a “dry-in” condition in the shortest possible time not only saves cost but also helps minimize moisture-related problems such as mold. Just-in-time delivery of components reduces jobsite management and helps eliminate theft.

BENEFITS OF BUILDING WITH PRE-MANUFACTURED COMPONENTS

<i>TIME</i>	<i>Framing time can be cut by 30-50%.</i>
<i>LABOR</i>	<i>Fewer skilled framers and job site supervisors needed.</i>
<i>QUALITY & CONSISTENCY</i>	<i>Computerized shop drawings catch discrepancies up front.</i>
<i>OPTIMIZED MATERIAL</i>	<i>Reduces waste, saving valuable financial and environmental resources.</i>
<i>SECURITY</i>	<i>Just-in-time stops pilferage and vandalism.</i>
<i>UNCLUTTERED JOB SITE</i>	<i>Critical when working in "tight sites."</i>
<i>FLEXIBILITY</i>	<i>You decide how much pre-installed "value-added" you want.</i>

HOUSES FRAMED IN A DAY... WITH ONE THIRD THE CREW

Sound impossible? Not with Armstrong Building Components. We understand the needs of our builder partners and appreciate the coordination and teamwork needed to build successful projects. With nearly six decades of experience, you can count on Armstrong to help make your project a success.
