## Redmond Office

The Roberts

Residence...

Remodel/Addition

Carnation, WA

This year, Armstrong Homes of Redmond added a 2nd story addition to the Robert's home we built in 2003. In so doing, we detached the roof, hooked onto the entire roof section with our crane and set it on the ground. We then set the panelized walls for the addition into place and replaced the entire roof section.

To the left is a picture of the existing home before we started. Click below to see the video of us removing the existing roof and replacing it after the 2nd story walls were installed. All in 1 day!!

[CLICK HERE TO SEE VIDEO](#)

To the right is the finished product... Addition installed, and the roof back in place.

Trust Armstrong Homes to build your new home and remodel it, when your needs change!
